CARRER OBJECTIVE

Dedicated and motivated individual with a background in B.tech, AI&ML, currently developing skills in Full Stack Development . Passionate about building efficient and scalable applications with hands-on experience in projects like ResQCare.

Seeking an entry-level role to apply technical skills and contribute to innovative solutions.

Bulidind carrer in AI&ML and exploring various carrer options

PROJECTS

ResQCare

[link](#)

- ResQCare is a web-based emergency response platform designed to provide quick access to essential services during critical situations.
- It enables users to find nearby resources and book services such as doctor appointments, emergency hospital bed booking, emergency food support, and emergency fuel support system.
- Technologies used : HTML , CSS , Type script

Quantum based Secure data transmission system

[link](#)

- A quantum-based secure data transmission system uses principles from Quantum Mechanics to protect information in ways that classical encryption cannot.
- this system relies on quantum key distribution (QKD)—a method where encryption keys are shared using quantum states (like photons). A well-known protocol is BB84 protocol.
- Technologies used : python

Hospital Management system

[link](#)

- This program is a simple Hospital Management System developed in the C programming language. It is used to store and manage patient records using file handling.
- This is a basic data base storage and management system
- Technologies used : C language

Bell state Explorer based on quantum

[link](#)

- This is a basic website based on detail explanation of Quantum Bell states. It is mainy developed to measure the Probability of Bell states randomly.
- Technologies used : HTML,CSS ,JAVASCRIPT.

EDUCATION

Bachelor in technology [AI&ML] – present

2025 –2029

Pragati Engineering College

{present}

- Major in CSE with specialization [AI&ML]
- CGPA: 9.0

Board of Intermediate

2023–2025

Sri Chaitanya junior college

- Final CGPA: 9.7

SKILLS

- Frontend : HTML , CSS JAVASCRIPT
- Programming : C , C++(Basics) , python(Basics)
- Negotiation Skills
- Problem-Solving
- Time Management
